

EDGE

CONCEPT

EDGE is an acoustic product which gives the room life in a sculptural and modern way.

Apart from EDGE is beautiful to look at the various angled surfaces helps the sound getting isolated from all sides.

EDGE is a product that can be used in private and the buisnessmarket.

The shape and size of EDGE makes it easy to set up on the desired surface whether it is on the wall or ceiling.
The size of the EDGE makes it possible to fit it in many different sizes of surfaces.

EDGE can be assembled by the consumer wants and needs. Whether it is on a narrow horizontal wall or on a higher vertical wall EDGE can be assembled in the desired direction.

An idea for further development on EDGE could be to make it possible to use EDGE as a room divider. Thus, a room divider which is also a acoustic and modern product.
