

# SEASON MODULES

We intend to explore new uses for Troldekt acoustic panels, offering great functionality and simplicity, using a system of modular units which can be customized into different combinations, becoming decorative furniture that easily adapts to the user's needs.

As Troldekt acoustic panels are made in Denmark, this proposal is inspired in Danish lifestyle, which experiences strong variations in each of the 4 seasons, readjusting to the significant climate changes that occur.

The shape and color of the modules allude to Copenhagen's buildings with sloping rooftops and can be customized according to the user's needs, modifying its inner space, stacking them into different shapes, connecting the modules with cables in order to get organic and scattered arrangements. The modules can be used both vertically and horizontally and may vary in width, length and depth.

The purpose of Season Modules is to share Danish culture with the world through a stylish design that can be contemplated and utilized in multiple locations and different situations.
